

## J            FUNDERS

Interwoven are very grateful to Exeter City Council, Devon County Council and to the National Lottery Heritage Fund for variously funding training for new *Squilometre* Champions or supporting individual street Pods when bringing their street celebrations to fruition.

As a funder of a new *Squilometre*, or a street project within an existing one, you are enabling communities to take control of their own celebrations and implanting the necessary skills in the heart of those communities. Each *Squilometre* has the potential to operate on an independent circular economy but this notion is so new and that it requires kick-starter funding and support. The intention however is that any upfront funding enables self-sufficiency in the future. As a *Squilometre* funder you're playing a role in developing new, sustainable economies.
